1 UUMISM Visits Iskandar Educity

2 CAREER TALK

3 UUMISM Celebrates Anis Dylan Sinno's MSSM Qualification

UUMISM VISITS ISKANDAR EDUCITY

On Tuesday, 23 June 2026, a group of 25 UUMISM students from Years 9 to 11, accompanied by three teachers, embarked on an academic excursion to Southampton University Malaysia and Reading University Malaysia, in Iskandar EduCity, Johore Bahru. The visit was jointly organised by Southampton University, Reading University, and Pro Edu Consultancy, with transportation arranged via a chartered bus departing UUMISM at 7.00 am.

The first stop of the day was Southampton University, where students were welcomed with an informative session outlining the range of courses offered, along with their entry requirements and future career prospects.

Given the strong STEM interest expressed by the participating UUMISM students, the highlight was a special seminar on Game Design within Computer Science. The session opened students' eyes to the interdisciplinary nature of game development—combining programming, storytelling, mathematics, and digital art.

A guided campus tour followed, giving students a close look at Southampton's state-of-the-art labs. Many were particularly impressed by the well-equipped spaces and the university's emphasis on innovation, research, and a hands-on approach to learning.

The morning concluded with lunch served on campus.

After lunch, the group proceeded to Reading University Malaysia, where the afternoon was packed with interactive, skill-building activities.

Students were first challenged with an engineering tower-building competition, working in teams of five to construct the tallest and most stable structure possible—while staying within a given budget. The activity encouraged teamwork, creativity, and strategic thinking, and quickly became one of the most memorable moments of the day.

Next, students were introduced to Revit, a leading architectural design software widely used in industry. This hands-on session allowed them to experiment with digital modelling and understand how architects and engineers collaborate using modern tools.

The final highlight was a live demonstration of Reading University's LIDAR machine, showcasing how augmented reality and 3D modelling are transforming the fields of architecture and urban planning.

The visit concluded with tea served on campus, giving students time to reflect on what they had learned and engage with university staff.

Teams of budding engineers and quantity surveyors constructing their towers at Reading University

The group returned to UUMISM at 8.20 pm, tired but enriched by the wealth of new knowledge and experiences. The visit successfully broadened students' understanding of university pathways in engineering, computer science, architecture, and emerging technologies.

This excursion marks another step in UUMISM's commitment to preparing students for global opportunities through meaningful academic engagement with tertiary institutions and real-world learning experiences.

CAREER TALK

This June, UUMISM was honoured to host a series of Career Talks featuring distinguished professionals from the fields of finance, law, and hospitality education.

The series began with Liyana Helmy on 25 June 2026, who shared her journey from studying actuarial science to building a successful career in finance and strategy consulting. She introduced students to the fields of insurance, actuarial science, and data science, while highlighting the importance of adaptability, analytical thinking, and lifelong learning in an ever-evolving industry.

On 29 June 2026, Gary Ng Kit Min, Deputy Dean of the Faculty of Law at Multimedia University, inspired students with insights into the legal profession and his transition from legal practice to academic leadership. He highlighted the importance of law to society and encouraged students to develop critical thinking, integrity, and strong communication skills as foundations for success in any career.

The final session on 30 June 2026 featured Suresh Issac Oliver and Kitty Lee, Regional Main Representatives of IMI Switzerland, who introduced students to exciting global opportunities in hospitality, tourism, and culinary education. They highlighted the diverse career pathways within the industry and the value of international exposure, practical experience, and professional skills.

Each session offered valuable career insights, real-world experiences, and practical advice, encouraging students to explore diverse pathways and pursue their future aspirations with confidence. We thank all our speakers for generously sharing their knowledge and inspiring the UUMISM community.

UUMISM CELEBRATES ANIS DYLAN SINNO'S MSSM QUALIFICATION

UUMISM is incredibly proud to celebrate the remarkable achievement of Anis Dylan Sinno from our Specialised Golf Programme, who recently competed in the Kejohanan Sukan Golf Majlis Sukan Sekolah Negeri Melaka Peringkat Negeri Tahun 2026. The tournament was held from 6 to 7 May 2026 at Ayer Keroh Country Club, bringing together talented young golfers from across the state.

Throughout the two-day, 36-hole championship, Anis showcased outstanding focus, confidence, and sportsmanship on the course. His strong performance and determination led him to secure the title of Johan bagi Perseorangan Lelaki 18, marking a proud milestone in his golfing journey.

This incredible achievement has also earned Anis a well-deserved qualification to represent Melaka at the Majlis Sukan Sekolah Malaysia (MSSM). His success is a reflection of his hard work, discipline, and continuous commitment to improving his skills both as a student and as an athlete.

At UUMISM, we take great pride in nurturing students who strive for excellence beyond the classroom. Anis' accomplishment is an inspiring reminder of what dedication, perseverance, and passion can achieve. Congratulations once again to Anis Dylan Sinno – UUMISM is proud to stand behind you as you continue your journey to MSSM!
